

ML Time Series API 1.0.0 OAS 3.1

/openapi.json

Production API for anomaly detection and gap filling in industrial time series data.

Catalogue

GET /api/v1/datasets List all datasets

POST /api/v1/datasets Create dataset

PUT /api/v1/datasets/by-name/{dataset_name} Create or update dataset by name

POST /api/v1/datasets/{dataset_id}/signals Create signal in dataset

GET /api/v1/datasets/{dataset_id}/signals List signals within a dataset

PUT /api/v1/datasets/{dataset_id}/signals/by-name/{signal_name}
Create or update signal by name within dataset

GET /api/v1/signals/{signal_id}/preferences Get persisted signal preference profile

PUT /api/v1/signals/{signal_id}/preferences
Create or fully replace persisted signal preferences

PATCH /api/v1/signals/{signal_id}/preferences
Partially update persisted signal preferences

Model Catalogue

POST /api/v1/models Create or update a contextual model assignment

GET /api/v1/models List context-eligible models (requires signal_id or dataset_id)

GET /api/v1/models/general List global model registry

Sources

GET /api/v1/sources/connectors List source connectors

POST /api/v1/sources/connectors Create source connector

POST /api/v1/sources/connectors/{connector_id}/validate
Validate source connector settings

PUT /api/v1/signals/{signal_id}/source-binding Create or update signal source binding

GET /api/v1/signals/{signal_id}/source-binding Get signal source binding

Jobs

POST /api/v1/jobs/diagnose Execute Data Quality Assistant (Full DAG)

POST /api/v1/jobs/diagnose-file Execute Data Quality Assistant from CSV file

POST /api/v1/jobs/diagnose-dataset Execute Data Quality Assistant for a full dataset batch

POST /api/v1/jobs/diagnose-dataset-file
Execute Data Quality Assistant for dataset batch from CSV file

POST /api/v1/jobs/sandbox/diagnose Execute sandbox data quality audit (single signal)

POST /api/v1/jobs/sandbox/diagnose-file
Execute sandbox data quality audit from CSV (single signal)

POST /api/v1/jobs/sandbox/diagnose-dataset
Execute sandbox data quality audit (dataset batch)

POST /api/v1/jobs/sandbox/diagnose-dataset-file
Execute sandbox data quality audit from CSV (dataset batch)

POST /api/v1/jobs/train Unified Training & Optimization Pipeline

POST /api/v1/jobs/optimize Optimize model hyperparameters (Optuna)

POST /api/v1/jobs/byom/validate Validate BYOM external model connectivity

GET /api/v1/jobs/{job_id} Get job status

GET	/api/v1/jobs/{job_id}/result	Get job result	⌵
GET	/api/v1/jobs/{job_id}/result/signals/{signal_id}	Get job result filtered by signal	⌵
GET	/api/v1/jobs/{job_id}/result/summary	Get job result summary	⌵

MLOps Automation

POST	/api/v1/scan-architectural-drift	Escanear deriva arquitectónica	⌵
POST	/api/v1/scan-data-drift	Escanear deriva de datos	⌵
POST	/api/v1/force-retrain/{signal_id}	Forzar reentrenamiento manual	⌵

Observability

GET	/api/v1/metrics/operational	Get operational API metrics	⌵
-----	-----------------------------	-----------------------------	---

Health

GET	/health	Liveness probe	⌵
-----	---------	----------------	---

Schemas	⌵
---------	---
